

OVERVIEW

EZ Ops software equips oil and gas operations teams to focus on the top priorities for efficient production.

Operating efficiently must get simpler

How do you decide what really needs to get done as an operator with so much information to sort and so many systems to log into?

We found a way to use technology to see the top priorities clearly. Now we offer that software to others seeking to operate most efficiently.

Easy-to-use software field teams prefer

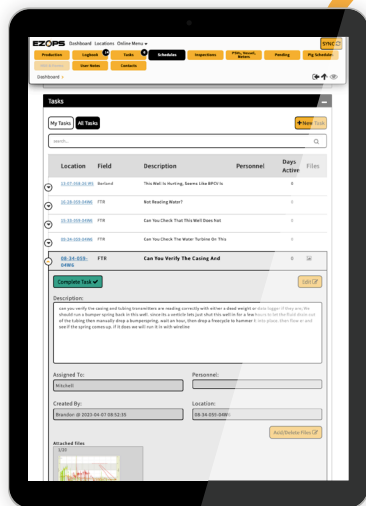

Built by operators for operators, EZ Ops provides all of the capabilities needed to operate by exception behind one login.

EZ Ops software is a one-stop information hub for field operations management.

- Streamline communication and reporting across field teams and with head office.
- Make it simple for field teams to identify and focus on the top priorities.
- Reduce costs, optimize production and achieve ESG compliance goals, everyday.

VALUE FOR OPERATORS

- ✔ **Save time and get more done** by guiding field teams on top priority activities for the day.
- ✔ **Reduce OPEX costs** by clearly seeing the specific operations actions that will save \$2000 versus \$20 and yield the most production.
- ✔ **Save time coordinating** and tracking actions across teams and with vendors.
- ✔ **Proactively manage** emissions and safety, with streamlined, accurate reporting.
- ✔ **Save hours** eliminating duplicate data entry and automating routine tasks.
- ✔ **See what's happening** in an area, whole region or across your operations.
- ✔ **Reduce drive time** knowing all the actions to take at a location in one visit.

CORE CAPABILITIES

You can start small with a few EZ Ops modules or adopt the system fully to gain max efficiency.

FIELD DATALOG & PRIORITY MANAGEMENT

See ranked operations priorities for the day including unscheduled, and one-off work orders. Gain clear communication across teams to coordinate timely activity and see updates. Data entry matches your current processes, no duplication.

FIELD SCHEDULING & MAINTENANCE

Plan and manage maintenance, inspections, compliance activity, and pigging from one scheduling and reporting tool. Reduce downtime, prevent issues, and coordinate activity efficiently with third party inspectors.

PRODUCTION MANAGEMENT

Track production and consumption, and communicate the needs of the field for fluids management. Track and review field level production and calculate production volumes for accounting purposes.

COMPLIANCE MANAGEMENT | EMISSIONS AND SAFETY

Streamline tracking and assignment of compliance management activities in the field. Ensure accurate and timely reporting of incidents, giving head office visibility on progress and supporting timely resolution.

✔ WHY CHOOSE EZ OPS?

EZ Ops saves our customers up to 15% of OPEX and equips them to achieve ambitious compliance goals.

We're the right choice for producers that expect not just great technology, but responsive service and timely implementation. Our team is made up of former and current operators who get your needs. **Our know-how has helped us earn a 100% adoption track record in the field.**

How can we help you?

Assess how our software can support your efficient operations.
