

FIELD DATALOG & PRIORITY MANAGEMENT

Operators, see ranked priorities for the day to yield the most production at the lowest cost, on target for compliance.

Are your operations leader keeping track of multiple systems, phone calls and emails to try and sort the priorities of the day and direct field teams? Has adding emissions tracking and compliance management pushed days to more than 10 hours long? Overwhelmed and frustrated operators can make the wrong calls or miss issues. Plus, if your operators are scribbling notes in a 'well bible' while doing daily routines then entering data in a system later, that means field teams are using old data for hours everyday. And for operators, that duplicate data tracking costs about 30 minutes a day. To operate efficiently, operations leaders need software to help prioritize field activities, and make real-time communication and reporting easy.

EZ Ops equips oil and gas operations teams to focus on the top priorities for efficient production as they hit compliance and safety goals.

Our software does the analysis so field operations teams see a daily task list that factors in routine small tasks, proactive maintenance and compliance and unscheduled, one-off work orders. Teams can work efficiently and communicate instantly. With EZ Ops:

Operators work less, with better asset performance - Operations leaders can yield more production, cost savings and proactive compliance in less hours a day.

Auto-prioritize activity - Task lists prioritize routine and one-off activities for cost-effective production and to meet or exceed compliance goals.

Streamlined cross-team communication - like Slack for operations teams - everyone is connected and can coordinate effort and share status updates.

Alarms save monitoring time - detect out-of-normal operating conditions with alerts.

Easy trend analysis and reporting - Data is searchable, shows trends and is easily analysed by operations and management and exported for reporting.

Less trips to the field - Activities are grouped by location, to eliminate duplicate trips.

Field teams can work offline - data syncs once Internet connection is available.

No duplicate data entry - EZ Ops integrates with SCADA, PVR, and other systems so data only gets entered once, and stays accurate.

“EZ Ops is an absolute communication game changer, I have been able to manage 3 times as much with less headaches.”

OPERATOR // RELIANCE PRODUCTION OPTIMIZATION

By best scheduling high volume of small value items, we save operators 2 hours per day. That time can go towards optimizing high value wells & reducing emissions.

SAVE MONEY & TIME

- Communicate efficiently across teams and synchronize activity
- Cut travel cost to the site
- Order the correct parts the first time
- Reduce time needed from tradespeople / contractors
- Hold 3rd parties accountable to a budget and task list

INCREASE PRODUCTION

- Spot and resolve issues early
- Give management visibility into plant conditions
- Review and analyze data for trends

ENVIRONMENT & SAFETY

- Reduce drive time, GHG and safety risk with less trips to the site
- Free time to proactively monitor operating conditions

EVERYONE ON ONE PAGE

With EZ Ops operations teams have a one-stop shared information hub to coordinate activities, keep everyone up to speed on task status. EZ Ops also gives management visibility on any issues response underway and real-time data access for reporting.

WHY CHOOSE EZ OPS?

Built by operators for operators, EZ Ops provides all the capabilities needed to operate by exception behind one login. Our software is customizable and comes in flexible modules.

EZ Ops saves customers up to 15% of OPEX and equips them to achieve ambitious compliance goals. We're the right choice for producers that expect great technology, and responsive smart service. Our team is made up of former and current operators. Their know-how has helped us earn a **100% adoption track record in the field.**
