COMPLIANCE MANAGEMENT

Proactively manage compliance in the field. Reduce emissions and ensure accurate reporting.

How long does it take your organization to perform AER audits and report on operations and production? For many producers, it takes days to gather information from different systems at report time. Compiled data often has gaps or errors, so corrections get made manually. The report gets done but management lacks confidence in the data. Companies need to get in front of compliance management, scheduling ESG tasks and tracking data efficiently so reporting can be automated and accurate.

EZ Ops streamlines tracking and assignment of compliance management tasks in the field. Ensure accurate reporting and support timely resolution of issues.

With our software, field operations teams can proactively schedule compliance activity, reduce data entry, and pull reports faster. Operators have more time to prevent issues. With EZ Ops:

Data entry is simplified - EZ Ops integrates with other systems to reduce data capture effort and keep reporting accurate.

Data is centralized - all data including from pigging operations, catadynes and fugitive emissions is in one platform at ops and management fingertips.

Simplified proactive scheduling ensures compliance management and maintenance tasks get done routinely with efficient effort.

Reporting is consistent and reliable, with trend data for operations teams to mine and for management analysis.

Emissions and well data is report ready - related data MSAPR and AER data is combined with relevant well data and ready for export for reporting.

Audit reports are automated - Foremen or management can automatically pull audit reports.

Detect and resolve issues real-time - auto-track issues and equip the first person on site to share full information (data and graphics) to resolve issues quickly.

> *During an ABSA audit, It was pretty cool seeing the completed PRD inspections on EZ Ops. Everything was time and user stamped which made it very clear inspections were actually being done in the field.*

BEN // CRYSTAL CLEAR TESTING

Companies can reduce AER emissions reporting from days to hours. Operations teams regain time to proactively optimize production and manage compliance.

SAVE MONEY & TIME

- Save operators time for field data tracking
- Cut compliance reporting time from days to hours
- Coordinate, timely resolution of issues

EVERYONE ON ONE PAGE

With EZ Ops operations teams have a one-stop shared information hub to coordinate activities, keep everyone up to speed on task status. EZ Ops also gives management visibility on any issues response underway and real-time data access for reporting.
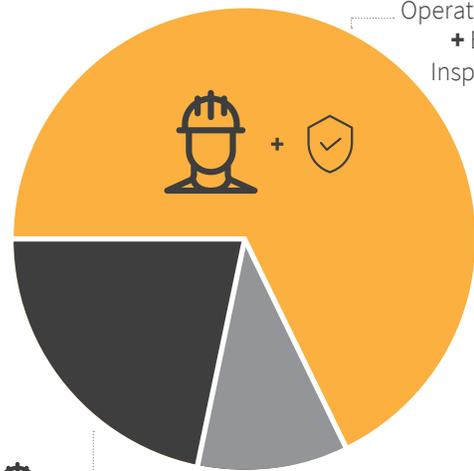

INCREASE PRODUCTION

- Spot and resolve issues early
- Avoid freezing or shutdown of Cata-dynes
- Give management visibility into issues for rapid, efficient communication
- Enable data export and integration with other systems to analyze trends

Operators **65%**
+ Emission Inspector for MSAPR

ENVIRONMENT & SAFETY

- Rapidly detect compliance issues to take immediate corrective action
- Make on the spot adjustments to reduce emissions
- Report more accurately, giving management and investors confidence

Foreman **20%**

Management **15%**

WHY CHOOSE EZ OPS?

Built by operators for operators, EZ Ops provides all the capabilities needed to operate by exception behind one login. Our software is customizable and comes in flexible modules.

EZ Ops saves customers up to 15% of OPEX and equips them to achieve ambitious compliance goals. We're the right choice for producers that expect great technology, and responsive smart service. Our team is made up of former and current operators. Their know-how has helped us earn a **100% adoption track record in the field.**

How can we help you?
