

PAYLOAD™

AN EZ OPS COMPANY

Carrier

THE FUTURE IS PAPERLESS TRUCKING.

For Carriers looking to save money, work efficiently and reduce paperwork, digitizing the truck ticket process is a key step. PAYLOAD Carrier streamlines order to invoice in a single trucking logistics system.

HOW DO YOU DO THAT?

CREATE TRANSPARENCY

By digitizing your field tickets and real-time asset tracking.

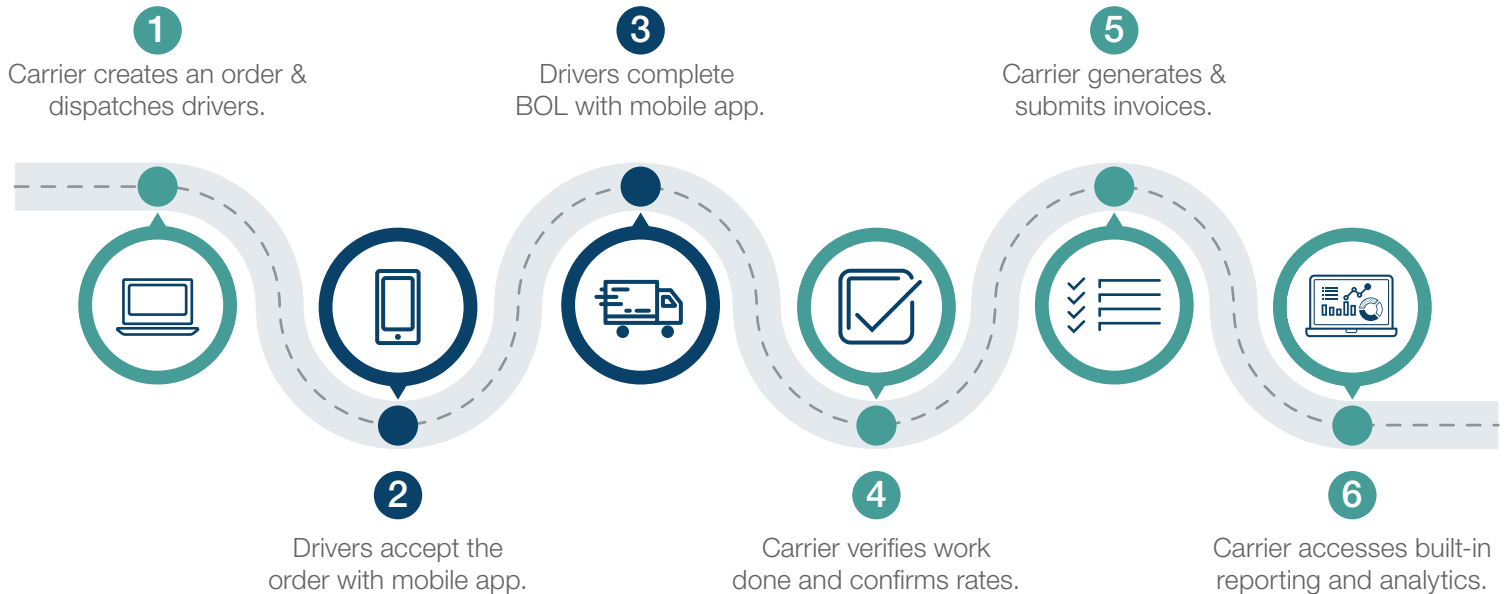

BUILD AUTOMATION & EFFICIENCIES

By leveraging automation and data to increase accuracy of paperwork and identify inefficiencies.

Payload is a logistics software platform that connects companies and service providers giving them the tools they need to optimize transportation activities and maintain regulatory compliance.

HOW PAYLOAD CARRIER WORKS

BENEFITS

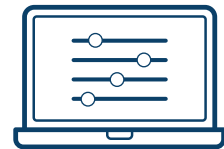

OPERATIONAL EFFICIENCY

- Less time spent costing tickets.
 - Increased invoice accuracy.
- Direct integration to producer invoicing software.
 - Built-in billing styles that match your MSAs.
 - Simplified fleet and equipment management.
- Schedule reports to deliver relevant data to clients.

WORKFLOW MANAGEMENT

- Improved ability to verify work completed.
- Easier and more accurate order tracking using the live map and ETAs.
- Reduced paperwork for drivers with ticket and BOL details entered on mobile.
- Real-time insight into driver hours of service.

VISIBILITY AND CONTROL

- Live tracking of assets.
- Shortened dispute process with a complete audit trail.
- Support environmental and safety goals with fuel consumption, load utilization, and carbon footprint reports.
- Customizable internal and external reports.
- Geofencing provides insight into field activity, verifying time-on-site and wait times.
