PAYLOAD™

Ticket

Paper ticketing is full of costly administrative work and compliance reporting pressure.
Payload Ticket makes it easy to digitize your logistics and shipping manifests.
We save you time and money and give you real-time visibility.

70.8% reduction in time it takes to complete a field ticket.

84.1% reduction in time spent managing your field ticket process.

HOW DO YOU DO THAT?

CREATE TRANSPARENCY

By digitizing the field ticketing process including shipping manifests.

GAIN INSIGHTS

By trending and forecasting operations.

BUILD AUTOMATION AND EFFICIENCIES

By leveraging the data Payload collects, you can implement changes that create efficiencies that save you time and money.

Payload is a logistics software platform that connects companies and service providers giving them the tools they need to optimize transportation activities and maintain regulatory compliance.

HERE'S HOW IT WORKS

ORDER

• Generate an Order and attach relevant supporting documents such as SDS and Road Use Agreements

• Add AER and TDG details to help generate driver paperwork

• Assign the Order to a vendor.

• Your vendors accept the order and assign to a driver.

TRACK

• Track the status of your field tickets in real time using the Live Map.

• Track your product.

• Monitor total project expenses.

• Use the audit trail to confirm and review activity on each Order.

VERIFY

• Reconcile the work you ordered with the work completed.

• Verify costs, volumes and wait times in real-time.

• Approve or dispute work completed online, significantly reducing invoicing and admin time.
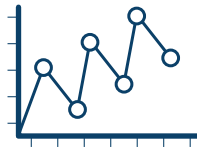

REPORT

• Auditable reporting on activity and complliance.

• Compare "should" costs with "actual" costs.

• Identify inefficiencies and non-compliance.

• Integrate into your accounting systems.

BENEFITS

COST REDUCTIONS

• Reduction of Non-Productive Time (NPT).

• Reduction of penalties and fines.

• Less time spent managing accruals and manual entry errors.

• Complete transparency into work completed.

• Reduction of wait time budgets.

• Reduction of admin and management costs.

• Simplified dispute process.

PREDICTIVE MANAGEMENT

• Trend and forecast your field operations.

• Use data gathered to contribute to carbon footprint calculations and reporting.

• From real time insights into daily, monthly and annual business activity creating optimized workflows.

• Faster vendor payment.

• Easily assess vendor performance.

CORPORATE SUSTAINABILITY

• Faster reconciliation process.

• Improved Health, Safety and Environmental Standards with real-time alerts and issue reporting.

• Quick access to tickets already processed.

• Increase your Corporate Social Responsibility (CSR) awareness with stakeholders.

• Mitigate increasing carbon tax costs.
