presents

EZLogix

THE FUTURE IS PAPERLESS TRUCKING.

Many Carriers are looking to save money by leveraging digital solutions to eliminate paper and create more efficient operations. Digitizing the truck ticket process is the first step to realizing cost savings that can make a big difference to your business.

HOW DO YOU DO THAT?

CREATE TRANSPARENCY

By digitizing your field tickets and real-time asset tracking.

BUILD AUTOMATION & EFFICIENCIES

By leveraging automation and data to increase accuracy of paperwork and identify inefficiencies.

We proudly supports **27% of Canadian oil production**, making our technology a top choice for oil producers and trucking companies. By adopting our product, carriers significantly enhance operations and contribute to a more efficient and interconnected industry ecosystem.

EZ Logix is transportation management system that connects companies and service providers giving them the tools they need to optimize transportation activities and maintain regulatory compliance.

HOW EZ LOGIX WORKS

1 Carrier creates an order & dispatches drivers.

2 Drivers accept the order with mobile app.

3 Drivers complete field ticket with mobile app. Instantly generate and manage essential transportation documents, including TDG/AER forms and digital BOL , directly within the mobile app.

4 Carrier verifies work done and confirms rates.

5 Carrier generates & submits invoices through automatic submission to OpenInvoice.

6 Carrier accesses built-in reporting and analytics.

BENEFITS

Transition to a fully digital operation from day one, eliminating paper use and enhancing efficiency. Our platform supports automated document generation, including digital tickets, TDG and BOL that can be emailed directly from the app, ensuring a seamless and environmentally friendly workflow.
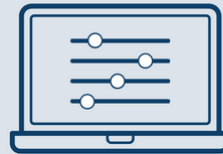

OPERATIONAL EFFICIENCY

- Less time spent costing tickets.
- Increased invoice accuracy.
- Built-in billing styles that match your MSAs.
- Simplified fleet and equipment management.
- Schedule reports to deliver relevant data to clients.

WORKFLOW MANAGEMENT

- Improved ability to verify work completed.
- Easier and more accurate order tracking using the live map and ETAs.
- Real-time insight into driver behaviour, such as hours of service and speeding.

VISIBILITY AND CONTROL

- Live tracking of assets.
- Shortened dispute process with a complete audit trail.
- Support your environmental and safety goals with fuel consumption, load utilization, and carbon footprint reports.
- Customizable internal and external reports.
- Geofencing provides insight into field activity, verifying time-on-site and wait times.

DATA INTEGRATION & ACCESSIBILITY

- Integration Capabilities: EZ Logix allows for easy data translation and export, ensuring seamless integration with existing systems, maintaining operational flow.
- Direct Ticket Sharing: Offers enhanced communication by allowing digital tickets to be emailed directly from the app, ensuring stakeholders are informed and can respond swiftly to updates.
